MONITOR, ALBERTA, THURSDAY, AUGUST 18 1921.

Monitor School Fair Thursday September 15th.

Local Happenings

Miss L. Mellet returned to her home at Munson Alta. on Sunday last.

H. Greenbank wants a man. Prefer a man to stay on job will pay \$3.50 a day or \$50. a month.

Mr. and Mrs. Evan Morris of Kirriemuir, were visitors to the tennis courts last Sunday.

If you are in need of a man, or if you want a job—consult the News Bulletin Board.

Miss Rhoda Cameron left on Friday a.m. for a visit with friends in Edmonton.

Mr. J.L. West, former Principal of Monitor School is looking over his interests in this district this week. His many friends were very glad to see him again.

Miss Woodrow, who has been visiting the Misses Anderson, returned to her home in Calgary last Friday Morning.

Mr. Glover, one time pitcher of the Monitor Baseball Club, paid a visit to town over the week end.

Mrs. (Rev.) Davidge received the sad news of the death of her sister, on Thursday last. The sympathy of the community is extended to Mrs. Davidge in her sad bereavement.

Melotone Wins

A phonograph test at the Eskdale School was as exciting as an election, the trustees inviting dealers to appear with their cabinets, the first men of the district being seated so as to judge the music as it came through a curtain from a machine which could be heard and not seen. It was very impressive, that picture of those wise judges solemnly seated, fingering their whiskers and meditating as to the tonal qualities of the different phonographs, the very atmosphere laden with visions of some of the world's great artists.

Behind the curtain were various machines upon which as many experts plied with monkey wrenches and other modern tools in efforts at adjustment for producing the maximum of sound. After mature deliberation it was decided that the Melotone, handled by L.C. Spitzer, had won, and the machine remained to brighten the school days of the youths of that district.

The Kennedy Drug Company are the agents for this famous Melton in the district. The instrument can be heard at any time at the Drug Store.

TWO DELIGHTFUL RESORTS IN THE

CANADIAN PACIFIC ROCKIES

LAKE WINDERMERE CAMP

A Bungalow Camp Built Among Fir Trees on a Terrace at the Edge of Lake Windermere, a Lovely Warm Water Lake Lying in the Beautiful Columbia Valley.

A Camp where you can enjoy Mountain Scenery, with every Form of Outdoor Diversion.

LAKE WAPTA CAMP

Information and Full Particulars will be gladly furnished on application to any Agent of the

CANADIAN PACIFIC RAILWAY

Tax Sale

Sale of lands in the Municipal District of Stewart No 302.

Notice is hereby given that certain lands in the Municipal District of Stewart No 302 will be offered for sale for arrears of taxes and costs at Minor School N.E. 26 33-6-4 on Thursday the 15th day of December 1921

The first week in November a full list of said lands may be found in the Monitor News and the Consort Enterprise or a list of the said lands; may be obtained on application to me.

Dated at Monitor the 13th day of August 1921

Jas. Norton
Sec-treas.

Mr. Molander of Erskine, has a mare which this year is without a colt, but just to keep up the record, she is suckling a young calf—says the Market Examiner of Calgary.

We had a letter from Mr. C.C. Connah last week, in which he states they bumped into a regular hurricane at Buffalo Lake. Their prairie schooner was wrecked, and the horses half frozen. Later on one of the horses had to be despatched. Mr. Connah reports rain every day.

There seems to be considerable doubt in the community as to just what the "going wage" for harvest help is. We have made considerable enquiry along the line, and find that the average is \$4.00 per day. Some points are offering \$5. In Alberta, apparently, the wages run from \$4 to \$5.

Monthly wage scale is from \$50 to \$60

LOCAL ITEMS

Hughie McDonald is busy renovating his property on Council St. Are congratulations in order, Hughie?

Bing! or Byng! is in Monitor. No. It isn't Lord Hyng but J.C. Mathesons goose-hound. Here's how Bing.

B.R. Cramer is having an addition built on his premises on Council Street. It is being built on the north side.

Work has been commenced on the new building to be erected on Dr. Mason's property on Main Street N. Mr. Seabury is excavating the cellar.

Charlie Yee, our enterprising Restaurant man has had his premises fixed for lighting with electric light. The power is being supplied by the Pioneer Store (H.L. Crisp) and makes a decided improvement to the best restaurant for many a mile.

Miss G. Major, who has been employed by Mr. and Mrs. F.M. Tarr, has accepted a position with Mr. and Mrs. Melkjohn of Consort.

Dick, our canary, has been moulting. Last Sunday the operation was apparently completed, for he sang—for the first time in about 6 weeks.

An impromptu dance was held in the big Hall last Saturday evening. The music was a la Gramophone and everyone present had a good time.

Considerable improvement has been made to our village by the cutting of weeds on Main St. Now, if everyone will cut the weeds on their own property and adjoining vacant land—won't it be a g-r-r-r-and and glori-r-r-r-ious sight.

Tenders Wanted

Notice is hereby given that tenders will be received by the undersigned for the construction of One Hundred and Seventy-five feet (175) of Cement Sidewalk, at the west corner of Main Street and Railway Avenue, passing the Bank building, in the village of Monitor. The lowest or any Tender not necessarily accepted. Full particulars may be obtained from the Reeve of the Village or.

H.A. Warner,
Secretary-Treasurer.

HELP WANTED

Do you want a man—or a job? If so, leave your name and address at the News Office and we will endeavor to help you. If practicable, the "Men Wanted" and "Positions Wanted" will be bullet bulleten outside the News office. If your wants are supplied, kindly inform us, so that your name may be removed from the list. There is no charge.

NOTICE

Will the purchasers who have ordered Fall Rye from H. McCarron kindly call for the same at once, as it is now threshed and ready.

The Egg Circle, recently established in town, now includes Fowl and chicken. Watch our Market Reports for prices.

Grade 8 Examination results show that two from Monitor passed. They are Reta Oliver and Ernest Deadmarsh.

The rain of last Monday some what hampered the threshing operations in the district, but the downfall was insufficient to cause serious delay.

The teacher of the Creek Valley School, Miss Hutchinson is certainly to be congratulated on the results obtained by her scholars in the recent Grade 8 Examinations. 100 per cent passed, and their names are Madge Elaine Baxter, Seena Buckway, Sophia Buckway and Genevieve Lewis.

Bill Schroer has been busy hauling gravel to the excavation on Dr. Mason's property in town. It is expected that the dwelling and cement cellar will be commenced this week.

Mr. Thos. Ulph has traded his property on the south side of the track to Mr. G. Tinkess for a plot of land of similar size on the north side, just east of the townsite. Mr. Ulphs buildings have already been moved, and he is now installed in his new location.

Miss Margaret Munroe suffered a serious accident last Thursday evening, when she fell out of a buggy in which she was playing and ruptured a blood vessel in her thigh. She was immediately taken to the hospital at Consort and operated upon by Dr. Day. She returned to her home on Saturday evening and at writing is well on the road to recovery.

PIPE or PIPELESS HECLA MELLOWAIR FURNACE

If the continuous saving of fuel means anything to you—you will want to know about the HECLA heating plant.

Send this Coupon for Free Facts TO NIGHT!

CLARE BROS. WESTERN, LIMITED - WINNIPEG

Send me, free, all particulars about HECLA (Pipe or Pipeless) Furnace.

Name _____ Address _____

Disarmament

The invitation extended by President Harding to Great Britain, France, Italy and Japan to join with the United States in a conference to discuss and consider ways and means of bringing about world disarmament was hailed with joy by people of all nations. The whole world is weary of war—even Germany has had all the war she wants for a long, long time. Although the formal invitation to this conference on disarmament came from the United States, there is hardly any question but that British influence played a large part in it. It is even open to question whether the initiative in the matter did not come from Britain, where, however, it was realized that the extending of such an invitation by the United States would not be viewed with the same suspicion by other European powers as would be the case if Great Britain made it.

Such a conference as has been proposed can hardly fail to be productive of much good, even though it may fall short of actually achieving world disarmament. The millennium has not yet come, and it is too much to hope that all nations are ready to abandon all war-like forms of national defence. During the Great War it was a frequently voiced expression: "This is a war to end war." But conditions still prevailing in Europe and Asia seem to preclude the immediate possibility of disbanding all armies.

France, the victim of German invasion twice within the memory of many men still living, is far from being convinced that the day for maintaining an army of defence is passed. Russia is commonly credited with now possessing the largest army in the world, and under the present Bolshevik regime cannot be depended upon for one moment. Should all other nations disarm, dictators of the Lenin and Trotsky type might seize the opportunity to ride roughshod over Europe. Poland, rejoicing in its new-found freedom, with Bolshevik Russia on the one hand, and a resentful Germany on the other hand, is hardly likely to be willing to rely solely on Russian and German promises of good behavior. And is the world willing to trust Turkey?

But if complete disarmament is not yet possible, it ought at least to be possible to bring about a tremendous reduction in armaments and a consequent lessening of the probabilities of war, and its horrors should it unfortunately not be entirely avoided. With the ignoble surrender of the German navy, and its subsequent destruction, the greatest menace to the liberties of the world was removed. If the remaining naval powers—Great Britain, United States, Japan, France and Italy—can agree to put an end to the creation of larger and more powerful navies; smash up their submarines and put a ban on their further construction, a great advance step will have been taken, and an enormous reduction effected in the burden of taxation imposed on the people of these countries.

Again, if an agreement could be reached to eliminate the aerial services from use in war a further advance step would be taken, the horror of future wars materially reduced, and untold millions of money saved. Otherwise, we are going to witness the expenditure of enormous sums in the perfecting of aerial machines of destruction, with each nation trying to outdo and outinvent the others. If in this age of marvellous inventions, the nations could be brought into agreement to reduce armaments to the old land soldiers of past ages, eliminate all recent inventions such as the submarine and airship from war use, and place the ban upon the use of all future inventions for warlike purposes, millions of money would be saved, the terrible magnitude of the last war prevented of repetition, and much of the fascination of war in its newer phases removed.

Greatly as we would like to see it, there is grave doubt of it being presently possible to bring about complete disarmament, and it is open to question, therefore, whether more would not be gained at the forthcoming conference on the subject if the matter of land disarmament was not dragged in, but the efforts at disarmament confined to naval, aerial, and kindred aspects of modern warfare.

There is a certain fighting instinct in the whole human race that cannot be entirely eradicated, but it should be possible for the nations to reach agreements which would stop the use of the inventive genius of man for the wholesale destruction of his fellowmen, and which would result in the prohibition of all new mechanical contrivances which, if persisted in, would make the next war a war of annihilation, involving not only soldiers and sailors on active service, but the entire civilian populations of all countries engaged in the struggle.

France Receives Radio Photograph

Transmitted Across Ocean By Powerful U.S. Wireless Station.

Transmission of photographs and written documents in facsimile across the ocean by wireless has been accomplished. Two successful tests of this epoch-making invention have been made at the powerful naval radio station at Annapolis, a photograph and written message having been sent to Malmson, the French radio station.

The first test of the invention was the sending of a photograph of the recent Dempsey-Garrett fight from the Annapolis station to France for reproduction in Le Matin, a Paris newspaper.

While the reproduction was said to have been fairly good, it was not as perfect as the engineers wished it to be. So another test was made.

This test was the sending of a facsimile written message from C. V. Van Anda, managing director of the New York Times, to Le Matin, the Paris newspaper. Word came back that the message was reproduced almost perfectly.

Surge Protection For You While You Travel

You may find the water bad, some poorly cooked food may excite trouble, a draught from a car window may give you an ache or pain—a cold room or damp sheets may cause rheumatic twinges. Remember this—any pain that is caused by congestion yields rapidly to Dr. Williams' Pink Pills. When your stomach is sour and upset, just try the magical effect of twenty drops of Nervine in sweetened water. If cramps wake you in the dead of night, Nervine will fix those awful cramps in a hurry. Keep a 35 cent bottle of Nervine in hand—always.

On Schedule.

Mistress—"Mary, how is it that the eggs for breakfast are sometimes boiled soft and sometimes quite hard?"

Mary—"Well, mum, I'm sure I don't know. I puts them in regular as the clock strikes eight, and I takes them out without fail when I hears the down train go by."

For Both House and Stable.—There is a good deal of similarity, especially speaking, between human beings and the lower animals. Both are subject to many ailments arising from inflammation and to all manner of cuts and bruises. Dr. Thomas' Electric Oil is an entirely reliable remedy for such ailments and mishaps in both human beings and the lower orders of animals.

True Word.

"There are few things more tantalizing to a man," declares the Haverhill Review, "than to go home with something on his mind he wants to scold about, and find company there and be obliged to act agreeable."

Corns are caused by the pressure of tight boots, but no one need be troubled with them long when so simple a remedy as Holloway's Corn Remover is available.

Strawberries In Cold Storage.

Fruit growers in the lower Fraser Valley, British Columbia, have put over 1,000 barrels of strawberries in cold storage to be held until the canners are ready to take them. The berries are packed in sugar and will keep in condition for preserving indefinitely.

The indications of worms are restlessness, grinding of the teeth, picking of the nose, extreme peevishness, often convulsions. Under these conditions one of the best remedies that can be got is Miller's Worm Powders. They will attack the worms as soon as administered and they pass away in the evacuations. The little sufferer will be immediately eased and a return of the attack will not be likely.

For Western Farmers.

This year the entire crop will put in the pockets of the Western Canada farmers the sum of about \$700,000,000. To produce this there is a tillage of some 30,623,000 acres, while 400,000,000 acres of arable land await the plough in the prairie provinces.

His Religious Belief.

The census-taker had asked many questions and Mike was tired of answering them. "And what is your religious belief?" the suave census man continued. "God forgive me, but I'm an atheist," said Mike.

Convinced Tanlac Is Wonderful Medicine, Declares Miss Reed

"I am convinced that Tanlac is a wonderful medicine because it has been more than a year now since I took it, but it toned up my entire system so well that I am still in the best of health," said Miss Maie Reed, popular saleslady, residing at 406 Kennedy Street, Winnipeg, Manitoba. "I dislike to have my name in the paper, but Tanlac has helped me so much that I actually feel it my duty to express my gratitude, so want everybody to know about my case. Nearly a year and a half ago, while I was living in Regina, my health broke down completely. I had rheumatic fever and for eight months was flat on my back in bed, unable to move an inch. I finally got up out of bed,

but was so weak I seemed to have no energy at all. My appetite was gone and instead of getting better I just worried along, getting worse, if anything. I could get no sound sleep and just felt miserable all the time.

"A friend of mine finally suggested that I try Tanlac, so I started taking it and by the time I had finished my second bottle my appetite was simply wonderful. I took four bottles in all, and all my strength and energy had come back to me and I was feeling like a different person. My health has been fine ever since and I haven't missed a day from my work. I can't say too much for Tanlac."

Tanlac is sold by leading druggists everywhere.

How Labrador Was Named

Portuguese Explorers Thought Natives Would Make Good Laborers

It is believed that Labrador was so named because Portuguese explorers thought the natives would make good laborers, or because of the labor required to make a living there. The name is connected with the old Spanish name of labor. The Labrador coast was discovered in the tenth century by Leif, the Norseman, but no explorations were made. It was again discovered in 1497 by John Cabot. Explorations and settlements were made and the peninsula was named.

LISTLESS, PEEVISH GIRLS

When a girl in her teens becomes peevish, listless and dull, when nothing seems to interest her and dainties do not tempt her appetite, you may be certain that she needs more good blood than her system is provided with. Before long her pallid cheeks, frequent headaches and breathlessness and heart palpitation will confirm that she is anemic. Many mothers, as the result of their own girlhood experience, can promptly detect the early signs of anaemia, and the wise mother does not wait for the trouble to develop further, but at once gives her daughter a course with Dr. Williams' Pink Pills, which renew the blood supply and banish anaemia before it has obtained a hold upon the system.

Out of their experience thousands of mothers know that anaemia is the sure road to worse ills. They know the difference that good red blood makes in the development of womanly health. Every headache, every gasp for breath that follows the slightest exertion by the anaemic girl, every pain she suffers in her back and limbs are reproaches if you have not taken the best steps to give your weak girl new blood, and the only sure way to do so is through the use of Dr. Williams' Pink Pills.

New, rich red blood is infused into the system by every dose of these pills. From this new, rich blood springs good health, an increased appetite, new energy, high spirits and perfect womanly development. Give your daughter Dr. Williams' Pink Pills, and take credit yourself and note how promptly their influence is felt in better health.

You can get these pills through any dealer in medicines or by mail post-paid at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Prince To Send Winners.

The Prince of Wales was a notable winner with his exhibits of Shorthorn cattle and Shropshire sheep at Bath and West and Southern Counties Agricultural Show, England, being the winner of most of the prizes. He declared his intention of shipping some of these farm aristocrats to his ranch near High River, Alta., where there is already a fine blooded aggregation.

Strangled with Asthma is the only expression that seems to convey what is endured from an attack of this trouble. The relief from Dr. J. D. Kellogg's Asthma Remedy is beyond measure. Where all was suffering there comes comfort and rest. Breathing becomes normal and the bronchial tubes completely cleared. This unequalled remedy is worth many times its price to all who use it.

Yes, Luke, a woman can sharpen a lead pencil as quickly as a man can thread a needle.

Minard's Liniment Relieves Neuralgia

The counterfeit coin may be lead, but it's hard to push.

The Polka Dot

Editor Finds Out Where Pattern Got Its Name

Although Lord Northcliffe, of the London Times, with a reputation for more knowledge than the average encyclopedia, was stumped of the meaning of "polka-dot," as applied to the cravat he was wearing, he left Toronto for the west, the editor of the Drygoods Economist has unearthed the solution to the problem.

Three quarters of a century ago a Bohemian peasant dance called the polka, swept the old world and the new, creating as much of a sensation as the one-step and the fox-trot of today. Everyone talked of the polka.

Just then some enterprising manufacturer got out a new style of dark silk fabric with contrasting spots or dots upon it. The rest was simple. The new fabrics, worn by the fashionable dancing the polka, became "polka dots," just as later we had merry widow hats and Alice blue costumes, and so on. There were polka shoes, polka gowns and all sorts of polka things.

EDITORIAL

The official conclusion of the school year 1920-21, as our readers are doubtless aware, happened a few days ago, when the examiners completed their task of awarding marks for the pupils' work at the examination held last June throughout the province.

It would be ill-timed reticence on the part of the Monitor News if the occasion were allowed to pass without some sort of expression of appreciation from us towards the Principal of our School, Mr. W.F. Hargrove, to whom we doff the editorial cap.

Monitor, as we have so frequently observed is a go-ahead town and a commercial hub of the near future; and we base our remarks on the important fact that to Mr. Hargrove as the Principal, is committed the intellectual welfare of the children of this district—to bring out and educationally mould all that is best in them.

Our readers will remember our optimistic remarks at the beginning of the past school term relative to Mr. Hargrove's record of previous successes. His achievements of the past term may justly be considered another triumph for him, as although the results of the work have not yet been received, and will be published at a later date, we are informed that one pupil, Tom Wheeler, passed a very successful examination in both Grades 9 and 10. This one case is remarkable in the fact that Tom only had about 8 months of preparation for the Exams.

It must also be remembered that some of the pupils of Grades 9 and 10 joined the classes at various dates subsequent to the commencement of the term, necessitating in each case or repetition of portions of the course of studies; that the Principal received the higher grade pupils at his residence during the evenings for further instruction, and, be it said to his credit, that this energetic man went so far as to open school on Saturdays in order to still further help towards a successful examination and we can but congratulate ourselves on the knowledge that the services of Mr. Hargrove have been secured for a further term.

Mr. Hargrove's interest in School Fairs, school sports and all things pertaining to the moulding of true manhood and womanhood needs no comment. Both he and his wife are keen sportsmen and a decided asset to any community.

While nothing definite is known yet, it is generally expected that school will start on the 29th of this month.

H. McCarron threshed out his rye crop the early part of this week.

Mr. and Mrs. Hargrove returned to town on Thursday evening last. They were accompanied by their son Paul, who is accountant in the Union Bank at Cowley Alta. Paul returned to his work, after a two weeks holiday on Monday morning.

Scholars, you can get the famous No. 566 "Velvet" pencil at the News office. A beautiful soft lead.

Lucas and Ehlinger announce that they have a full supply of all threshermens wants.

Secretary Of War's Son Has Wireless

Equipped Bicycle

Jack Baker, only son of Secretary of War and Mrs. Baker with his wireless equipped bicycle. Jack attached the radio outfit to his "bike" and while riding about Washington can receive messages sent from the Arlington station. He says he is going to rig up a sending set so that he can communicate with his home while riding about town.

Diet Not Everything In Keeping Healthy

Your table may be loaded with food digestible and wholesome, yet you don't get strong. What's the trouble? The liver is lazy, stomach is overloaded, the bowels are not active. Relief is quickly supplied by Dr. Hamilton's Pills. They make weak, sickly people strong and well because they keep the system clear of impurities. Those who regulate the system with Dr. Hamilton's Pills don't have indigestion or constipated headaches, they feel enlivened all over, because their system is kept in smooth running order. To revitalize and stimulate your whole being, to shake off lethargy and tiredness, nothing compares with Dr. Hamilton's Pills which certainly bring good looks, good spirits, good health, 25c all dealers, or The Catarhozone Co., Montreal.

The Homesteaders

— BY —
ROBERT J. C. STEAD
Published By Special Arrangement
With the Author.

(Continued)

He carried her to the tent and applied water to her forehead. As he was engaged in restoring her his hand fell on his gun. The barrel was hot. He raised her face to his, and kissed her again and again.

In the morning they found a few drops of blood on the grass at the top of the bank.

Harris and his wife allowed themselves no time for nerve-strain over the experience of their first night on their homestead. It was fortunate for them there was so much to do, and that they were thrown entirely upon their own resources. Their little store of money was running low, and they decided their house must be of the cheapest possible construction. Harris had already discussed his buildings with McCrae, who advised him to make use of sods, and gave general directions how to do so; and he now set about to put McCrae's suggestions into effect. Some fifteen miles north of the homestead was a valley in which grew trees of sufficient size for building purposes—poplars, cottonwoods, elms and oaks. Farther down the valley, at the head of a lake, was a saw-mill, where boards and shingles might be bought—if one had money.

So this morning after caring for their cows, they hitched the horses to the wagon, took an axe, a saw, their gun, and a lunch, and set out for the valley, returning at dusk with sufficient logs and poles for the framework of their house and stable. The next day construction was commenced. Four stout posts were set on end, enclosing a rectangle twelve by sixteen feet. The tops of the posts were connected by logs laid upon them, dovetailed at the corners after the fashion of woodsmen, and held in position by wooden pins driven in auger-holes. Lengthwise along the centre, to form a ridge-pole, another stout log was laid, and the whole framework supported by additional posts, among which were two on the east side to enclose the door. Small poles were then placed on end, slightly inwards, and resting against the plate-logs. Similar poles were laid from the plate-logs to the ridge-pole to support the roof.

Harris found a southern slope where the frost was not enough to admit of him ploughing some sods. He knew he would not get at good sod here as later in the season might be found in some low-lying spot, but his first consideration was to get some kind of permanent shelter. So he ploughed the sods, three inches thick and fourteen inches wide, and cut them into two-foot lengths with his axe, to the sad injury of its cutting edge. These sods were then built into a wall like bricks, resting gently against the framework of poles, from which, however, they were separated by a padding of grass, which Harris cut in a sleugh with his scythe, and small willows from the ravine. This mattress of grass and willows prevented any earth shaking through into the house itself. A framework made of a heavy log was inserted in the south wall to leave space for a window, which should be bought when the family finances could afford such luxuries. For the time being it would be left open in fine weather and covered with canvas when the elements were gruff and unruly. The rag-carpet, when no longer needed as a tent, would be draped in the doorway, pending the receipt of boards to make a wooden door.

W. N. U. 1381

For a roof, grass was laid on the poles and covered tightly with sods. Then Harris found a sticky, yellow clay in the side of the ravine, and two or three inches of this he spread carefully over the sods, like icing on a cake. The greasy clay soon hardened in the sun, and became so impervious to water that the heaviest rains of summer made no impression upon it.

When, save for the missing door and window, the house was finished, they stood in the centre and admired. It was absolutely the product of their own labor, applied to such scanty resources as the earth provided. But it was warm and snug, and as they later on learned, the wall and roof of sod were almost perfect non-conductors of either heat or cold. The floor was of earth, but Mary Harris knew the difference between earth and dirt, although the words are frequently confused, and her house was from the first a model of cleanliness and order.

By this time the snow was all gone, except in north-facing nooks along the ravine, and the frost was out of the sod in all places deep enough to admit of ploughing. As the stock were taking no harm from the open air, thanks to the shelter of the ravine, Harris decided to delay the construction of his stable until after seeding and to proceed at once with the ploughing of his land. He had also to make a trip to Arthur's for seed grain, and to borrow a couple of sections of drag harrows. With it all, by the middle of May he had sown fifteen acres of wheat, and notwithstanding a heavy snowfall about the 23rd, by the 1st of June he had added ten acres of oats. With his help Mary had planted a small garden of potatoes and vegetables, and a few flowers were springing up at the door of the house.

It was a life of hard, persistent work—of loneliness, privation and hardship. But it was also a life of courage, of health, of resourcefulness, of a wild, exhilarating freedom found only in God's open spaces. They had learned to know the animals of the field—the cheery gopher; the silent, over-industrious badger; the skunk, unchallenged monarch of his immediate circle; the sneaky coyote, whose terror is all in his howl; the red fox, softly searching amid the grass for the nests of ducks or prairie chicken; and the rabbit, cunning but always gracefully elusive. Then there were the waterfowl, infinite in number. The stuffed ducks on the dinner-table were limited only by the amount of powder and shot which Harris cared to spend on the pond at their door. At night, when the horses had been unharnessed and dusk was setting in, he would slip his gun under his arm and walk down among the willows. It was necessary only to wait. Two graceful forms, feeding under a grassy bank, hearing a slight rustle above, would shove with quick, silent stroke into the supposed safety of their native element. Harris would peer through the dusk for the brighter markings of the male, for only a game-murderer shoots the female in the nesting season. Then, as they separated a little, his gun would speak; a sudden splashing of water; a sharp whistle of rapid wings cutting the air; a form, padding an uncertain circle in the pond, then lying strangely flat upon the surface. Harris as yet had no dog, and often it meant stripping and a sharp plunge in the ice-cold water to bring in the trophy; but the strong, athletic young man counted that only part of the sport. At other times the nights were clamorous with the hooting of wild geese, and in the morning Harris, slipping quietly over the bank of the coulee, would see the prairie white as from the ice-fallen water with the backs of countless thousands of "waves." Sometimes the geese, secure in the supposedly unsettled wilderness, relaxed the vigor of their military guard, and on such occasions he could get within range. But if there is one quality the goose lacks it is that which is most attributed to him—foolishness. On his marches through the unmap-ped desert of the air he moves with the precision of an army in the field, scouting out all the land, taking aerial observations before making camp, and immediately throwing out sentries around his feeding ground. But long-continued immunity from attack breeds carelessness, even in a goose, and the price of such neglect frequently adorned the table in Harris's cabin.

The prairie flowers, too, were a never-ending delight to the heart of the young woman. She knew some of them by name, but many were peculiar to the prairie. The few warm days of spring had clothed all the wilderness with a magic carpet of pale-purplish blossoms, and the advancing season brought new blossoms to view with every passing week. On Sundays, when there was total relaxation from their regular labors, the two, arm in arm, would stroll along the bank of the ravine, or walk, ankle-deep in strawberry blossoms, far over the undulating plain to the west. Resting, they would find their way to the edge of the stream, where, in the shallow crossing, the suckers would dart in all directions in panic at their appearance. Here they would listen to the gentle murmur of the water, while fleecy clouds mirrored themselves in its glassy depths, and the plovers ran whistling up and down the bank, and a meadow-lark sent its limpid challenge from a neighboring bush. And at night, when the moon rose in wonderful whiteness and pur-

False Claims.

WE hope there is no Mother who thinks she can treat her sick baby without calling in a Physician, or with remedies that she uses for herself.

Most Mothers know that Baby requires remedies especially prepared for babies, yet there are some who think that what is good enough for them is good enough for Baby, and it is to these Mothers we appeal to give nothing to their babies that is not specially prepared for babies or recommended by their Physician.

False claims may kill, but false claims can never restore your child.

For over thirty years Fletcher's Castoria has been aiding in the reduction of the deaths among infants as Mothers have become more and more acquainted with it. Always keep it in the house.

Exact Copy of Wrapper.

Children Cry For

Fletcher's
CASTORIA

Are You Prepared?

A doctor in the house all the time would be a good idea. Yet you can't afford to keep a doctor in the family to keep baby well or prevent sickness. But you can do almost the same thing by having at hand a bottle of Fletcher's Castoria, because it is a wonderful remedy for indigestion, colic, feverishness, fretfulness and all the other disorders that result from common ailments that babies have.

Fletcher's Castoria is perfectly safe to use. It is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. Children cry for Fletcher's Castoria, and mothers recommend it because they have found it a comfort to children and a mother's friend.

If you love your baby, you know how sweet it is to be able to help baby when trouble comes. You cannot always call upon a doctor. But doctors have nothing but good to say of Fletcher's Castoria, because they know that it can only do good—that it can't do any harm—and they wouldn't want you to use for baby a remedy that you would use for yourself.

MOTHERS SHOULD READ THE BOOKLET THAT IS AROUND EVERY BOTTLE OF FLETCHER'S CASTORIA

GENUINE CASTORIA ALWAYS

Chas. H. Fletcher.

THE CENTAUR COMPANY, NEW YORK CITY.

ity, wrapping field and ravine in a riot of silver, the strange, irresistible, unanswerable longing of the great plains stole down upon them, and they knew that here indeed was life in its fullness—a participation in the Infinite, indefinable, but all-embracing, everlasting.

CHAPTER V.

The Shores of the Infinite.

The summer was a season of great activity and development. Harris did not sow any crop after the 1st of June, but applied himself then to the construction of his stable, which was built after the same fashion as the

house. The shelter of its cool walls and roof was gracefully sought by the cows in the heat of the day, and its comparative freedom from mosquitoes was a haven to the horses in the evenings. Then there was more land to plough, and Harris's soul never dulled to the delight of driving the ploughshare through the virgin sod. There was something almost sacred in the bringing of his will to bear upon soil which had come down to him through all the ages fresh from the hand of the Creator. The blackbirds that followed at his heel in long, respectful rows, solemnly seeking the trophies of their chase, might have been incarnations from the unrecorded ages that had known these broad

fields for chase and slaughter, but never for growth and production. The era of the near vision, demanding its immediate reward, had passed away, and in its place was the day of faith, for without faith there can be neither seed-time nor harvest.

Allies Will Send Relief To The Starving Russians

Lloyd George Has No Admiration For Soviet Government, But Will Act on Humanitarian Grounds.

Paris.—The United States ambassador took part twice in the sessions of the Supreme Council, once in replying to Premier Lloyd George that he agreed that the traditional policy of the United States gave traders the right to sell arms to either belligerent in the Near East, and again, in replying to enquiries by the prime minister respecting Secretary Hoover's Russian relief plans.

M. Briand, the French premier, began the discussion of the Russian famine by saying that the Russian people who had fought with the Allies in the beginning of the war might justly look to them now for help.

"I propose that all the Allies join with the United States and the other nations who are interesting themselves in the administration of relief through Red Cross societies and other private sources," said M. Briand.

"I heartily agree to this," exclaimed Lloyd George, "but I wish to point out," he added, "that such efforts could not reach many of the sufferers. The Red Cross cannot perform the miracle of the five loaves

and two fishes. Relief must be organized immediately on a great scale not only for the sake of Russia, but for the sake of the world, because typhus, cholera and other plagues incident to famine would cause more losses than the last war."

"I have no admiration for the Soviet Government," Lloyd George continued, "but relief is impossible without its co-operation, inasmuch as it controls transport and all of the official machinery. No one could move about Russia without its permission. I think for this purpose, and this purpose only, the Allies should make some arrangement with the Soviet Government."

Lloyd George said he had been informed that some of the Russian provinces had surplus grain, but the peasants would not release it except in exchange for goods which they required. He suggested that the Supreme Council consider at once whether steps could not be taken to obtain grain in this manner for the famine area. The question was not a political, but a humanitarian one.

"When your neighbor's house is burning," he concluded, "you don't ask questions, but try to save it."

Ample Harvest Help

Winnipeg.—With approximately 25,000 harvest hands required for Manitoba and Saskatchewan already in the west, it was decided at a meeting of employment officials here to notify the railway officials that further excursion trains from eastern points should be held up, pending a survey of conditions. Whether the west has sufficient farm labor or not will be decided in the next day or so. Surprise was expressed by local employment officials at the expeditious manner in which the railways had dispatched so many harvesters from the east.

Loyalty of People of Dominion

King George Is Grateful For Work of Premiers at Conference.

London.—His Majesty King George in his reply to the address from the Imperial conference, emphasizes the fact that he had stirring and ineffable proofs from the peoples of the dominion of their loyalty and devotion in the enthusiastic and touching receptions invariably given on the several occasions of his visit to different parts of the world where the British flag flies, proofs which had been renewed in the remarkable demonstrations of welcome and goodwill to the Prince of Wales during his visit of the past three years. Furthermore, where could one find such ample testimony to their common allegiance to empire and sovereign as in their noble sacrifice during the four and a half years of the World War?

His Majesty added: "I followed with keen interest the deliberations of the conference. These meetings and the exchange of views between ministers of the great communities which they represent, upon the many problems affecting the common interest of the British peoples, are essential to the unity and well-being of the empire and the general peace of the world. Every facility must be given, for such periodical meetings, and to ensure this, we look confidently to men of science and research to discover an improved means of intercommunication between all parts of the British commonwealth."

"I know the work of the conference has been strenuous, entailing severe demands upon all concerned, but their time was well spent in advancing further along the road of progress and development."

"I heartily thank them, on my own behalf, and that of the Queen, for the address. We wish Godspeed to those who are leaving England and a safe and happy return to their respective homes and families. More than ever do we follow with feelings of affection, the welfare of our people at home and across the sea."

To Unify the Laws Of the Provinces

Ottawa.—An attempt to unify the laws of the various provinces, with the exception of the province of Quebec, which has been under consideration by a committee for some time, will be reported upon at the annual meeting of the Canadian Bar Association which opens here on September 6, and continues until September 8. Each province, with the exception of Quebec, is represented by a commissioner. The exception on the part of Quebec is due to the radical differences in its insistence on the maintenance of its civil laws granted under the B.N.A. Act.

Soldier Settlers

Have Good Crops

Success of Community Settlements Exemplified in Indian Reserves.

Winnipeg.—Soldier settlers in the northern parts of the three prairie provinces will harvest from 20 to 35 bushels of wheat to the acre, according to Captain L. B. Boyd, a federal inspector of the Soldier Settlement Board, who has been here attending a conference of district supervisors. Returned soldiers who have settled in communities throughout the west, have done remarkably well from every point of view, Captain Boyd declared. The outstanding success of community settlements, he stated, is exemplified in the Indian reserves, thrown open through the Board for Soldier Settlement. Notable among these are the Riding Mountain, Pilot, Porcupine and Pouce Coupe reserves. In every one of these places community settlements have been established, with an average of 80 acres per settler under cultivation. The population of these settlements range from 200 to 600 people.

Six U.S. Prisoners Released. Riga, Latvia.—Six United States prisoners in Russia have been released by the Soviet authorities and have arrived at Narva, Estonia, in fair condition. The six were Emmett Kilpatrick, Weston Bestes, William Flick, X. B. Kalamatarfo, H. J. Lamare and Russell Pallinger.

The Life of Ne-Gua-nan-I-sew

By O-GE-MAS-ES (Little Clerk).

(Copyright)

(Continued)

About this time, now in the nineties, a young colored doctor from Chatham, Ontario, had settled in Kintstino, some thirty miles west of my homestead, and was practising his profession there and visiting the scattered settlers with much success. This was glad news for me and I drove up and called on him at the first opportunity, and we soon became fast friends. He was much interested in the Indians and when I told him of the deaths of Ne-gua-nan-I-sew's children and described the symptoms, he made me promise that if another child was born to this couple it was to be brought up to him for examination. On my next visit to Neshtow and his poor sad wife they listened with the greatest eagerness to my tale of the new doctor, and it was rather amusing when I described his color. Ah, they said, if a white doctor's medicine is strong, why a black doctor's must be stronger. However, they promised faithfully if a new baby came they would surely follow my advice. A year or so elapsed and in they came with a fine little baby girl in the Moss Bag and resembling her mother very much. Both were anxious to see the new medicine man, so we all went up to Kintstino, I going as interpreter. After a careful examination the doctor gave certain instructions and these they promised faithfully to carry out. Then in three months time, and in fact every three months for at last a year, they were to bring the babe for another medical examination. At about the age of two the doctor performed a slight operation for tubercular gland.

The child thrived, the parents were immensely grateful, and this girl baby gradually developed into a fine handsome young woman who went to Emmanuel College. She was the pride and delight of her parents and through her efforts they both became converted to Christianity. In the meantime, two other children were born to Neshtow and being duly treated by Dr. Shadd, grew up fine youngsters. A happier, more contented Indian family you could not find, but alas, the sequel of this true tale proves that in the midst of life we are in death.

The season was early fall, following an extremely dry summer, and Neshtow and all his family were camping in the hills south of Ethelton. The country was broken and brule, with a tremendous growth of grass and much dead old bottom. For days the atmosphere had been smoky. Suddenly a heavy gale of wind arose and Neshtow finally decided to make for the open country, but in every direction they tried to proceed, fire or dense smoke headed them back. Finally, in despair, he set all hands to make as big a clearing as possible, also to dig a hole (axes the only tool) to shelter them if the fire swept over the camp. Then he hobbled and threw his two ponies and covered their heads up with a blanket. How they all worked in spite of the awful heat and suffocating smoke, then with a roar the actual fire was on them and one by one he saw his dear one's perish, reckless of his own life he clasped them in his arms to extinguish the burning garments, but his loved wife, his brilliant daughter and the two young children all perished.

When a rescue party arrived he was still conscious, though very badly burned. They insisted on taking him down to the doctor, but his wish was to die and join his loved ones, the quicker the better.

I was not present when they brought the poor maimed child of nature into Dr. Shadd and laid him on a couch. After a short examination he pronounced the case hopeless, and when they told poor Neshtow this, he thanked God and calling his friends who had rescued him he dictated his last wishes. He asked that sufficient of his goods be sold to meet his debts, and sent a special message of goodwill to me. Then, folding his poor burnt arms across his chest, and with a cheery "Goodbye, doctor," thus perished Ne-gua-nan-I-sew, a gallant Indian gentleman.

Fortunately some years before the date of the wiping out of this family, old South-Wind and his wife had died so they were spared much grief.

Indian Prevention of Bush Fires.

Old South-Wind was my first Indian friend in the Stony Creek country (now Melfort district), and not only selected my first location, but gave me much kind and sound advice as to me, it was a new district. His forefathers, for generations back, had made this district their hunting grounds and he pointed out to me with pride the fact that all the first growth timber was still standing untouched by fire. When asking him what I should do in regard to this preservation of the green woods (which of course meant saving the fur), he replied as follows:

Just as soon as the snow goes off in the spring and the grass on the ridges is dry, put out your fires. The snow is still in the woods and no harm will result. Then later on as the hay-swamps dry up and you have the ridges surrounding them burnt off, why do the same to the hay.

I followed the old Indian's advice from 1883 to 1893 without losing a stick of green timber, but in the year 1893 a number of settlers came in and when I was burning the ridges in the spring of 1894, one of these men, a man from North Dakota, warned me that he had been appointed a fire guardian and that I would be pulled if I did not stop putting out spring fires.

I tried to show the new men the folly of this but without success, so for two or three years the old grass collected until it formed a mat on the ground over a foot thick, then one of their number let a fire out in a dry fall. Many of these new settlers lost their buildings, several barely escaped with their lives, and two young Indians perished in the hills. Millions of feet of good green timber were burnt, and some thousands of acres of black soil were burnt off clean down to the clay sub-soil and, naturally, the fur-bearing animals were wiped out.

This law from Regina may have suited southern ranchmen but it was a positive evil in this country where more grass grows on one acre than ten or twenty in the south. Our legislators should have had old South-Wind at their councils.

We few settlers became exhausted in trying to check this awful fire so appealed to the Mounted Police for assistance. Help was promptly and effectively given us, as usual, with that noble body of men.

Fire Raging in Russian Oil Wells

Flames Cannot Be Extinguished and Loss Will Be Disastrous.

London.—Fires are raging in 18 oil wells in the suburbs of Batum, the great oil centre in Asiatic Russia, according to advice from Reval, Esthonia, by the Central News Agency here.

There appears to be no means of extinguishing the conflagration, the message added, and the loss of oil will be disastrous. The disaster will be more keenly felt on account of the famine and cholera in that district and the consequent scarcity of labor, resulting in scanty supplies of coal and firewood for the winter, the message said.

Secondhand experience is almost as good as new, and it costs less.

WEEDS

Save and stack by the chicken house all Sheaves with bad weeds, enough for the chicken to Scratch and pick at for a year as they need the work and the seeds, also save all weed seed around the settings for scratch feed for the young chicks next spring.

There are only a few that save enough out sheaves to last through springs work; besides saving cost of threshing, and best of stock feed, they are necessary to make variety for the work horses, with hay and chop, during the heavy work of spring, as the chaff is necessary to help aid digestion, and easy to carry as hay and grain when going to town or road work or any away from stable feeding; also if you have any steers, you should start now to feed them heavy on bundles of all kinds, oats, wheat Rye or Barley, get the money out of them; everyone is going out of cattle, now is the time to start, and those in cattle should get their Second wind and get in right, on the real, new, basis; good stuff, well cared for and hurried to market, fat, as baby beef; I am more convinced than ever that this is a stock country, sheep, cattle, hogs, big horses and lots of poultry. I saw today a flock of 100 turkeys, all early hatched and big and doing fine, chasing the grasshoppers. But these cheap cattle, let every farmer fat up a few prime steers and bunch them all together to ship to England; Duncan Marshall paved the way; If you have scrubs, it is time you found it out, the government has been urging you to take their Free Pure Bred Bulls, and today, good steers, fed \$20 worth of grain, on this good short grass, will fit bunched together in a cargo bring you; instead of \$10 in Winnipeg market, bring \$80 net or more on Liverpool market; Start feeding them at once and let me know and I will inspect them and tell you if the right type for export. Don't miss conserving the moisture this fall; cultivate the stubble and get all weeds to grow and killed, as they rob the soil of the moisture;

Just make yourself believe it is going to be a dry year and save it all; The ammonia and moisture from snow can only be conserved by rigging the summerfallow late, and a loose mulch in all stubble; also get your fields compact; in shape; that is, seed to Fall Rye, all

long, exposed strips, flanked on both sides with gophers, and as soon as possible, seed down to Bromo and Rye grass, or alfalfa or sweet clover; The gopher loss is terrible in this district; Get the Farms cleaned up and ready to show, so we can put on the colonization scheme to get people on this vacant land, we need their taxes and trade, add the country needs the pro to get the balance on the right side of the ledger. I want pictures of all these good crops and good places.

Also every person who can farm or care for one of these vacant places let me know now, so it can be arranged, as no buyers will locate where they see weeds and poor grain, grasshopper or gopher eaten crops, poor stock and a general unprosperous appearing country.

Henry W. Weed,
Weed Inspector

Mr. and Mrs. Tarr Leave For Altario

Mr. and Mrs. F.M. Tarr, accompanied by their three children, left on Wednesday afternoon train for their new home in Altario, at which place Mr. Tarr has purchased the Pool Hall and Barber business.

Mr. and Mrs. Tarr need no introduction to the citizens of Monitor. Their whole-hearted interest in all things pertaining to the benefit of the community at large has often been remarked upon, and their place in the social life of Monitor and district, will be sorrowfully missed. Their combined artistic attainments, as heard in the orchestra of the Monitor Citizens Band, will be very hard to replace, as they have always had the interests of that organization at heart.

The News joins with a large circle of friends in wishing Mr. and Mrs. Tarr huge success in their new location.

Mr. V.C. Dunning, Editor and Printer, of Coleman Alta., was a visitor in town yesterday.

It is expected that Mr. Harry Bowers, of Coronation Alta., will arrive this evening to take the place of Mr. F.M. Tarr in the Barbering business here. Mr. Bowers is well known in Coronation as a first-class man - although single, and we trust the citizens of Monitor will welcome him, and give him the "glad hand" on his arrival.

The Old Order Changeth Yielding Place To New

The above photograph, illustrates the great advancement civilization has made in the matter of transportation in the far North. The two modes of travel, ancient and modern are shown together, and the one can cover as much territory in one hour, that the other took one week to do.

World Happenings Briefly Told

Chicago is experimenting with a wireless telephone system connecting all fire and police stations.

Transportation rates on livestock on the Pacific Great Eastern Railway will be reduced about 35 per cent. immediately.

For the first time in many years the water in Lake Superior is warm enough to permit comfortable bathing at Duluth.

Germany owed the U.S. up to April 20 last \$240,744.51 for maintenance of American troops on the Rhine.

"Silver Threads Among the Gold" ballet, with half a century of popularity, is still earning \$5,000 a year in royalties.

Secretary of Labor Davis says the U.S. Government can save \$50,000 annually by buying plain pencils without rubber tips.

Mrs. Wilbur Smith, 84, of Mantua, N.J., is cutting her third set of teeth. A printing plant for counterfeiting Government doctors' liquor prescription blanks was seized at Boston.

The sum of \$53,875 has been collected in Port Arthur for infractions of the Ontario Temperance Act and other prohibitory measures since the closing of the bars in 1916.

Icebergs, three hundred feet high and seven hundred feet long were seen off the Grand Banks of Newfoundland by passengers on the steamship Columbia which arrived at New York recently.

Twenty-four people have been reported drowned in serious floods which are raging throughout the prefecture of Yamagata. Five thousand houses have been submerged and forty bridges destroyed by the floods.

A trapper named Smith and another whose name is unknown, are believed to have been lost in the rapids of Black River in the Arctic Circle. Don. Cadswor, trapper from Rampart House, brought the news of the disappearance of the two men when he came to Dawson.

OF INTEREST TO WOMEN

This is a Short Letter, But It Proves the Reliability of Lydia E. Pinkham's Vegetable Compound.

Bothwell, Ont.—"I was weak and run down, had no appetite and was nervous. The nurse who took care of me told me to try Lydia E. Pinkham's Vegetable Compound, and now I am getting strong. I recommend your medicine to my friends, and you may use my testimonial."—Mrs. W. J. Brady, R. R. 2, Bothwell, Ont.

The reason why Lydia E. Pinkham's Vegetable Compound is so successful in overcoming woman's ills is because it contains the tonic, strengthening properties of good old-fashioned roots and herbs, which act on the female organism. Women from all parts of the country are continually testifying to its strengthening, beneficial influence, and as it contains no narcotics or harmful drugs it is a safe medicine for women.

If you want special advice write Lydia E. Pinkham Medicine Co. (confidential), Lynn, Mass. Your letter will be opened, read, and answered by women only.

W. N. U. 1381

Alberta Ships Horses

Trinidad Business Firm Ordered Them For Driving Purposes.

A trial shipment of Alberta horses is now on the way to Trinidad, where they are being sent on an order from a business firm there which wants three animals, of small build, standing from fourteen to fifteen hands in height and weighing from 700 to 1,000 lbs., bought in the vicinity of Calgary, are being shipped as a first consignment, and a second lot to make up a total of fifty will follow later.

The shipment is in charge of J. D. Smith, of the department of agriculture. He will ship from Halifax by one of the West India steamer lines, and after delivering the animals to their buyers in Trinidad will spend some time looking into the future horse market there and at other points in the Indies. If Mr. Smith's investigations are satisfactory, it is likely that other shipments from Alberta will be made in the near future.

That Dry Cough Is Bronchitis

If neglected, it will weaken the throat and perhaps reach the lungs. Nothing surer to help you quickly than the healing soothing vapor of Catarrhazone. Its action is magical, every congested spot is healed, irritation is soothed away, phlegm and secretion are cleaned out, all symptoms of weak throat, Catarrh, Bronchitis disappear. Catarrhazone is a genuine, scientific preparation. Sold everywhere in three sizes, 25c, 50c and one dollar for a complete two months treatment. Prepared by the Catarrhazone Co., Montreal.

Australia Gets Strange Weather

Snowstorm Is Unusual Experience for People of Antipodes.

A Reuter cable from Melbourne says that the entire state of Victoria has been experiencing very heavy weather recently, with a considerable snowfall, followed by a great deal of rain, even in Melbourne, where such conditions are most unusual. Several ocean vessels are overdue and there is some anxiety on account of coast vessels.

Lieut. Parer, of the Australian Air Force, who, with two companions, has been attempting a flight around Australia, ran into a blinding snowstorm and was obliged to descend.

A Divorce Granted

After many years of patient suffering, you can be divorced from corns, you can get rid of them completely by applying Putnam's Corn Extractor. This wonderful old remedy acts in 24 hours and never fails. Refuse a substitute and remember "Putnam's" is the truly Painless remedy. 25c everywhere.

1920 Fur Catch Worth Two Millions

Muskrat Pelts Account For Half of the Revenue.

During the hunting season of 1920, furs valued at more than two million dollars were sold by Saskatchewan trappers.

Muskrat pelts brought the heaviest revenue, Chief Game Guardian Fred Bradshaw states. Sale of these amounted to \$1,009,476. They sold at \$2 a pelt. Coyote skins were the next heaviest item on the sale list. More than 18,000 of these were sold, bringing a revenue of \$294,176.

One of the surprising features of the statement is that which deals with skunk pelts. It shows that 9,974 of these were sold for \$5 each, bringing returns to trappers amounting to \$49,870.

Other animals which produced good returns for hunters were: Minks, martins, beavers, badger and silver foxes, weasels, badgers and wolverines.

Mr. Bradshaw says: "The most noticeable spread is that of muskrats, there being 380,328 pelts less than were purchased the year before. Beaver are down 500 skins, and weasels display a remarkable increase of 25,000. All varieties of foxes show a slight decrease, while the remaining kinds of fur bearers show only slight variations from the catch of 1919."

Of the inhabitants of Mexico less than one in three can read or write.

Minard's Liniment for sale everywhere.

Use Cuticura Talcum To Powder and Perfume

An ideal face, skin, baby and dusting powder. Convenient and economical, it takes the place of other perfumes. A few grains sufficient.

See 25c. Cuticura 25c and 50c. Talcum 25c. Sold throughout the Dominion. Canadian Depot: Empire Limited, 244 St. Paul St., W. Montreal.

Driverless Auto

Puzzled Police

Ohio Air Service Were Exhibiting Radio Controlled Car.

Dayton traffic policemen rubbed their eyes when a miniature automobile sailed past all semaphores. There was not a soul in it.

It was a driverless radio automobile controlled by a radio in a car 100 feet behind it.

The automobile itself contained no wireless and it is said to be the first of its kind publicly exhibited by the radio air service.

CHOLERA INFANTUM

Cholera infantum is one of the fatal ailments of childhood. It is a trouble that comes on suddenly, especially during the summer months, and unless prompt action is taken the little one may soon be beyond aid. Baby's Own Tablets are an ideal medicine in warding off this trouble. They regulate the bowels and sweeten the stomach and thus prevent all the dreaded summer complaints.

Concerning them Mrs. Fred Rose, of South Bay, Ont., says: "I feel Baby's Own Tablets saved the life of our baby when she had cholera infantum and I would not be without them." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

American Engineers Visit Cranbrook.

A party of fifty members of the American Institute of Mining Engineers will visit East Kootenay as the guests of the East Kootenay Prospectors Association and Cranbrook Board of Trade. The party will visit the Sullivan mine and other points of interest.

Minard's Liniment for Burns, etc.

Some schools of mackerel are half a mile wide and forty miles long and are estimated to contain one million barrels of fish.

"COLD IN THE HEAD"

is an acute attack of Nasal Catarrh. Those subject to frequent "colds in the head" will find that the use of HALL'S CATARRH MEDICINE will build up the System and render them less liable to colds. Chronic attacks of Acute Catarrh may lead to Chronic Catarrh.

HALL'S CATARRH MEDICINE is taken internally and acts through the blood on the mucous surfaces of the System, thus reducing the inflammation and assisting Nature in restoring normal conditions. All Druggists. Circular free. F. J. Cheney & Co., Toledo, Ohio.

We are hungry because the cells and tissues all over the body are calling for nourishment, and their call is known as "hunger."

For Rheumatic Pains.—The pains and aches of Sciatica and Rheumatism should be treated with Dr. Thomas' Electric Oil. The soothing and healing properties of this famous remedy have been demonstrated for fifty years. Use it also for inflammatory pains, cuts, scratches, bruises and sprains, either in human beings or the lower animals.

Signor Nitti, Italy's ex-premier, habitually smokes 40 cigarettes and 10 cigars a day.

One of the commonest complaints of infants is worms, and the most effective application for them is Mother Graves' Worm Exterminator.

The Brooklyn Bridge towers (New York) are 287 feet in height, the spire of Trinity Church, Broadway, New York City, three feet less, or 284 feet tall.

For Motoring Or Yachting

By Marie Belmont.

There are so many occasions during the summer when a handsome wrap is needed that it is always well to have a coat that may be adapted for various uses. The wrap is made of bolivia cloth, with trimmings of silk serge. The sleeves are cut in one with the rest of the coat and they are distinguished by their wide cuffs. The coat is slightly bloused in the front, but is drawn snugly to the figure below the belt. The draped collar, the cuffs and the bulging pockets are made of blue silk serge that contrasts well with the beige bolivia cloth. Beige stitching enhances their beauty.

The Need of Fresh Air.

Every time we breathe we draw thirty cubic inches of air into our lungs; supposing that we take fifteen breaths a minute for the twenty-four hours of the day, we use no less than 648,000 cubic inches of air, which would weigh over thirty pounds. One day's supply of air for one human being would be sufficient to fill 1,125 two-gallon cans; a year's supply would weigh more than five tons. From these figures it may be seen how necessary it is to keep windows open so that there may be a continuous supply of fresh air.

By making your purchases from your home merchant you are contributing direct to the prosperity of the community in which you live.

Fuel Control Unlikely

Cabinet Considers Situation Calls For No Action.

Fuel control by the Dominion Government during the coming winter is unlikely. According to Sir George Foster, the question of fuel control has been under consideration, but apparently the situation calls for no action by the federal authorities. Sir George pointed out that the Provincial Governments were in a position to appoint fuel controllers if they so desired. Conditions during the war were very different from those prevailing at present, he said, and now there was a supply of fuel for those who wished to purchase it.

CHANGE OF WATER WAS THE CAUSE OF DIARRHOEA

People moving from place to place are very much subject to diarrhoea on account of the change of water, climate, diet, etc. Prompt treatment with

DR. FOWLER'S EXTRACT OF WILD STRAWBERRY

in such cases relieves the pain, checks the diarrhoea, and thus does away with the suffering, the weakness and often-times collapse associated with an attack of this kind. It does this by checking the too frequent and irritating stools, settling the stomach and bracing up the weakened system, thus rendering it without a peer for the treatment of all bowel complaints of both old and young.

Mrs. Ernest S. Beaton, Grayburn, Sask., writes:—"Coming out here from the East, my two little girls took very sick, the change of water, etc., giving them diarrhoea. They were so pale, and used to vomit everything they would take, so I finally got a bottle of Dr. Fowler's Extract of Wild Strawberry, and I must say it certainly helped them. I have also used it when my children were teething and it is all you claim for it."

76 years reputation stands behind this remedy. Price, 50c a bottle. Put up only by Dr. T. Milburn Co., Limited, Toronto, Ont.

The Endurance of Your Automobile, Truck, or Tractor

Depends not only upon the time of Lubrication, but the kind of Lubrication.

WHITMORE'S AUTO GEAR PROTECTIVE COMPOSITION

Adds 500% to Gear Life. Thousands of tests have been conducted by Lubricating experts to demonstrate the relative efficiency of various lubricants. The results of these tests conducted over years, has fixed the choice of sixteen leading manufacturers. These manufacturers include:

The largest builder of fine cars in the world; The largest builder of trucks in the world; The largest builder of taxicabs in the world; The largest builder of worm gears in the world.

Many lubricants contain acid. They not only fail to counteract friction, but are themselves harmful and corrosive to gear and bearing surfaces.

Whitmore's Auto Gear Compositions Contain No Acids

They are proof against heat and cannot break down or squeeze out. In the Panama Canal Emergency Dams, six million pounds rest on an unbroken film of WHITMORE'S. After an exhaustive test the U.S. Army contracted for its exclusive use. Manufactured by The Whitmore Manufacturing Co., Lubricating Engineers, Cleveland, Ohio.

ON THE FUNNY SIDE

Among Our Exchanges DE DUCKS GOT IT

"I don't understand why you should want to borrow money when you have just shipped your corn" said a South Dakota banker to an Iris customer.

"De Ducks got it," replied Pat.

"What do you mean by ducks?"

"Well, I shipped the car to market and sold it for 52 cents. Then deduct freight that left me 31 cents; deduct one cent commission (the smallest deduction) that left 30 cents; deduct elevator charges; that left 27 cents deduct husking, that left 15 cents deduct hauling; that left 5 cents; deduct the hired man's wages from that and you are a don-sight better than I am if you can find anything left."

AN ESSAY ON MAN

Man that is born of woman is small potatoes and few in a hill. He rises up today and flourishes like a rag weed and tomorrow or next day the undertaker hath him. He goeth forth in the morning warbling like a lark and is knocked out in two rounds and two seconds. In the midst of life he is in debt and the tax collector pursueth him wheresoever he goeth. The bannister of life is full of splinters and he slideth down with considerable rapidity. He walketh forth in the bright sunlight to absorb the ozone and meeteth the bank junior with a sight draft for \$357. He cometh home at eventide and encountereth a wheelbarrow in his path. It riseth up and smiteth him to earth and falleth upon him, and runneth one of its legs into his ear. In the gentle, spring-time he putteth on his summer clothes and a blizzard blast striketh him far from home and filleth him with cuss words and rheumatism. In the winter he putteth on winter trousers and a wasp that abideth therein causes excitement. He started down the cellar with an oleander and goeth backward and the oleander cometh after and sitteth upon him. He buyeth a watch-dog and when he cometh home from the lodge the watch dog treeth him and sitteth near him until rosy morn. He goeth to the horse trot and betteth his money on the brown mare and the bay gelding with the blaze face procureth the ham. He married a red headed heiress with a wart on her nose, and the next day the herent ancestor goeth under with a fee arrest and great liabilities and cometh home to live with his son-in-law.
